## Career Objective

Seeking a PCB Design Engineer position at Cadera Systems Vietnam to apply over 15 years of experience in hardware design and PCB layout across IoT, consumer electronics, telecom, and automotive domains. With a strong foundation in digital/analog circuit design, PCB library management, and hands-on collaboration with PCB manufacturers, I am confident I can contribute effectively to the company's growth.

## Core Competencies

**PCB Layout & Design** High-speed, high-density multi-layer PCB design; signal & power integrity; Gerber generation, DFM verification

**Schematic Design** Digital/analog circuit analysis, component selection, performance/cost optimization, schematic capture

**EDA Tools** OrCAD Capture, Concept HDL, Allegro PCB Designer, Altium Designer, EAGLE, KiCad

**Interfaces & Debug** PCIe, DDR, Ethernet, UART, SPI, I2C; board bring-up, signal measurement, hardware debug

**Programming** C, C++, Python (test automation, scripting)

**Mechanical** FreeCAD, SolidWorks (enclosure design support)

## Work Experience

### Cadera Systems - Hardware Design / Firmware Engineer

Jul 2011 - Present

- Architected and delivered custom hardware for IoT, consumer electronics, telecom, and automotive clients - from specification through schematic design, PCB layout, and prototyping
- Built and managed component libraries (symbols, footprints, 3D models) across multiple EDA platforms
- Designed high-speed multi-layer PCBs, resolving signal-integrity and power-delivery issues
- Generated Gerber files, performed DFM checks, and coordinated with PCB manufacturers to optimize fabrication and assembly
- Led board bring-up, signal measurement, and hardware debug on complex multi-layer boards
- Developed bare-metal and RTOS-based firmware for MCU, SoC, and FPGA platforms
- Built hardware validation tools in C# and Python

### Acronics Systems, Inc - Firmware / Software Developer

Jan 2010 - Jul 2011

- Developed Linux device drivers and application software for Set-Top-Box platforms

## Education

### Ho Chi Minh City University of Technology - VNU (HCMUT)

Bachelor of Engineering in Electronics

2005 - 2010

## Additional Information

**Languages** Vietnamese (native), English (fluent - daily communication with US colleagues and clients)

**Portfolio** [vphtec.com](http://vphtec.com)

**Salary** Negotiable

**Work type** Full-time, on-site (Quan 11, HCMC)
